CORONAVIRUS
No visits to patients
Strictly controlled access to outpatient care
Emergency care is assured

If you enter the hospital, you must wear a mask. Please comply with the distancing rule. Ensuring that we all protect each other against infection is vitally important, now more than ever. It is everyone’s duty to ensure that we reduce the risk of infection by implementing the best possible level of hygiene and care. In order to minimize the risk that the coronavirus is brought into the hospital by visitors, patients and employees, we must implement strict precautionary measures.

Patients cannot be visited for the time being.

In particularly difficult cases, exceptions may be made between 4 pm and 6 pm. These must be agreed upon with the doctor providing care.

Access to our outpatient departments is strictly regulated and is subject to defined requirements. Please report to the reception of the hospital and/or the entrance area of the relevant outpatient department. Once there, you must fill out the form that we need for our documentation.

In general, patients in the outpatient department can only receive one visitor at a time.

Could you have the coronavirus?

Do you have or have you had flu or flu-like symptoms such as a dry cough, fever, sneezing or fatigue within the past 14 days? Have you had contact with anyone that has had a confirmed case of the coronavirus?

Call your general practitioner from home or contact the Bochum hotline on (0234/910–5555).

Accident and Emergency care is provided by the Accident and Emergency Department.
