Person-centered in all we do

We work in our establishments, under a Christian ethos, in a spirit around religious values that also form our guiding light. One of our most important responsibilities is to care for the mental wellbeing of those that place their trust in our institution and to support them. As we see it, medicine that we can trust also needs to keep a careful eye on the patient’s psyche.

Before patients leave the hospital, our social services and discharge management teams often help them in their continued care. They help patients in applying for various health care benefits and in organizing aid. In Family Care we can trust also needs to keep a careful eye on the patient’s psyche. One of our most important responsibilities is to care for the mental wellbeing of those that place their trust in our institution and to support them. As we see it, medicine that we can trust also needs to keep a careful eye on the patient’s psyche.

One of the biggest employers

The Catholic Clinic of Bochum employs around 5,000 employees. Working for us in these establishments at the heart of the Ruhr area, our clinics offer a wide range of treatments that cover almost all medical specialisms. Over 28,000 patients, of which approximately 60,000 are inpatients, trust in our expertise every year.

With around 6,600 beds, our clinic group is one of the largest health care providers in the Ruhr region. The area that we serve with our disciplines, some of which are very highly specialized, extends far beyond the region and even North Rhine-Westphalia itself. Our clinic group, which includes St. Joseph’s Hospital, the Eye, Nose and Throat Clinic and the Neonatal Unit in St. Elisabeth’s Hospital, is part of the University Hospitals of the Ruhr University of Bochum.

Our six establishments represent the highest quality, which is constantly subjected to checks. Health care is a matter of trust, and we gain trust via both our qualified expertise and our humanity. Top medicine and care from the heart with care from the heart is our motto, and ensuring your health is our ultimate goal. As we see it, medicine that we can trust also needs to keep a careful eye on the patient’s psyche.
